

Coyote Spas

Engineered for a Changing Environment.

Coyote. Engineered for a changing environment.

Across North America the Coyote has thrived, from the frigid north to the scorching deserts. She is renowned for her unstoppable ability to adapt to change. Even as we take over her habitats with our sprawling cities, the Coyote relentlessly adapts to survive and grow in number.

Like their namesake, Coyote Spas® are designed for a changing environment:

- Lower costs for tighter household budgets
- Larger seating areas for growing families
- Time saving water treatment technology for hectic schedules
- Customizable exterior designs to suit any landscape or personal style

There is a Coyote spa to suit any environment...

Room for 4 people!

The Bandit.

Small footprint. Big Value.

The Bandit makes getting into hot water truly affordable without compromising quality. Unlike other small portable designs made of vinyl or cheap plastic, the Bandit is a premium acrylic spa with many of the same features found in more expensive brands. Its light weight and 110V option* make it extremely portable. Reposition it in the yard or take it to the cottage for the summer!

- 2-4 person capacity (80.5" x 69.5" x 31.5", 204cm x 176cm x 80cm)
- 110V option*
- 12 powerful water jets
- Underwater LED light
- Comfortable multilevel seating
- Maintenance-free cabinet

* This option may not be available in all regions due to varying electrical regulations.

Room for 6 people!

The Outlaw.

The Outlaw makes getting into hot water truly enjoyable!

The Outlaw delivers modern therapy and efficiency in a traditional round design, comfortably transporting a group of 6 to a world of relaxation and fun. With multilevel spacious seating for the very tall, very small and everyone in between, the Outlaw is perfect for families of all sizes.

Its 110V option* enables the Outlaw to be plugged into any outlet to provide easy, economical installation.

- 5-7 person capacity (86.5" round x 39" deep, 219cm round x 100cm deep)
- 110V option*
- Multilevel open seating with a shallow child seat
- 18 powerful jets
- 1 x 56 frame Whitewater pump
- Underwater LED light
- Safety handrail
- Adjustable waterfall feature
- Ipod holder for sound system option

* This option may not be available in all regions due to varying electrical regulations.

Room for 6 people!

Drifter.

A big step up in comfort for a small step up in budget.

The Drifter is a fantastic family spa that features his and hers bucket seats, individual seating for 6 in an open plan, plus a child seat that doubles as an entry step. The rectangular shape also makes it easier to position in areas where space is limited.

- 6-7 person capacity (78" x 90" x 37", 198cm x 228cm x 93cm)
- 24 powerful adjustable water jets
- 14 standard air jets
- 1 x 56 frame Whitewater pump
- Dedicated seating for 6 plus a shallow child seat
- 2 therapy seats with cushioned headrests
- Underwater LED light
- Safety handrail
- Adjustable waterfall feature
- Ipod holder for sound system option

Room for 8 people!

Renegade.

The Renegade perfectly balances luxury with comfort.

The Renegade features spacious room for 7, dual pump massage power, a therapeutic swivel seat and a large internal entry step. If that weren't enough, the Comfort Command™ seat surrounds and massages you from every direction. The Renegade immerses you into the world of extreme spa luxury.

- 7-8 person capacity (90" x 102" x 37", 229cm x 259cm x 93cm)
- 32 powerful adjustable water jets
- 14 standard air jets
- 2 x 56 frame Whitewater pumps
- One total body massage seat with powerful Monsoon foot jet
- Dedicated seating for 7 plus a shallow child seat
- Underwater LED light
- Safety handrail
- Adjustable waterfall feature
- Ipod holder for sound system option
- 4 cushioned headrests

Room for 9 people!

The Chieftain.

The Chieftain is here.

It's big. It's powerful. It's got TWO Comfort Command™ seats and room for...7, yes, 7 more.

The Chieftain is extreme everything.

- 7-9 person capacity! (90" x 114" x 37", 229cm x 290cm x 93cm)
- 45 powerful water jets
- 14 standard air jets
- His and Her total body massage seats with powerful Monsoon foot jet
- 2 underwater LED lights
- Dedicated entry step with safety handrail
- Adjustable waterfall feature
- Dedicated seating for 10 plus shallow kids seat/step
- Ipod holder for sound system option
- 4 cushioned headrests
- 2 x 56 frame Whitewater pumps
- Diverter controls for maximum water jet pressure

Standard Features.

1 Ipod Holder

A convenient self-draining recess designed for the popular waterproof Ipod case.

2 Safety Handrail/Waterfall

All Coyote Spas® feature a safety handrail that is esthetically designed to also double as a calming waterfall feature.

3 DuraBlock Cabinet Frame

Common sense tells us that a one-piece frame is stronger. Physical science confirms it. The DuraBlock frame is made from high-density composite materials in one solid piece. With no screws or joints, it is made to withstand the test of time better than the rest.

4 Heatlock® Insulation System

Insulating foam is applied to the interior walls and floor, creating a dead air space similar to that found in most houses in North America. The spa equipment is positioned in this air space where it is kept at a constant temperature and any heat that is generated is recycled to keep the spa water warm. Less heat and electricity is wasted, saving you money.

5 Whitewater Pumps

Even the smallest Coyote Spas® use the powerful Whitewater 56-frame externally air-cooled pumps. Reliability, power and efficiency are the defining characteristics of Whitewater Pumps.

6 Filtration

Coyote Spas® telescopic floating weir filter system is simple and effective. The weir adjusts to the water level to skim the surface (where most contaminants accumulate) to ensure crystal clear water. Our state-of-the-art disposable depth filter collects more debris and requires no cleaning.

7 Total Access

Would you buy a car that has its hood welded shut? Of course not, so why would you buy a spa that does not have access to all plumbing and equipment? Coyote Spas® have total access through removable panels on all sides, not just one. Also, due to its superior Heatlock® Insulation System, there is no foam to block access to components that may some day need repair.

8 Massage Jets

Each and every water jet in a Coyote spa is high flow and adjustable. All jets have been strategically positioned to target major muscle groups and typical regions of physical stress.

The Drifter, Renegade and Chieftain models all come with the Therapy Air massage system; 14 dedicated jets that provide a gentle massage using forced air instead of water. Therapy Air puts you in charge of your massage intensity.

9 LED Lights

Coyote's LED lights are 60% brighter and good for up to 100,000 hours of use. In addition, all Coyote Spas® are easily upgradeable to the Peyote Mood Light system.

10 Self-Supporting Composite Hull

Every Coyote spa begins with the thickest, heaviest shell in the industry. Our beautiful and durable acrylic finish is backed with hand-rolled fiberglass composites that allow the hull to support several tons of water and people without any additional reinforcements. Most other spas have thin hulls that rely on foam for structural support. Foam or fiberglass, the best choice is obvious.

11 No-Work Cabinet Panels (Standard Cabinet)

Our No-Work Cabinet Panel material has a proven track record of withstanding the elements with zero maintenance. No sanding or staining required, simply hose them down if dirty. Most new homes in North America use this same material as exterior siding.

12 Rubber 4XFloor™

This tough, sealed, rubber exterior is impervious to moisture, pests and time. Simply position your Coyote spa on a level, dealer approved surface and relax. The rubber barrier covers the entire internal cabinet frame, protecting all internal materials and components from the elements.

13 Castcore® Cover

The wrong cover can cost you 1000's! Only Castcore® covers mould the entire foam core around a steel reinforcement to the exact shape of every spa: not cuts, no moisture, and no big bills for power or replacement covers.

Optional Features.

1 **Peyote Mood Lighting**

Feeling blue? Choose red, and get over it.

Any color, anytime. No more bulbs or lenses to replace and LED technology means you can expect up to 100,000 hours of faultless function. The underwater lights and the handrail become multicolor with the Peyote light upgrade.

2 **Lippert™ Ozone Water Treatment**

Ozone can dramatically help keep spa water clean and clear, but not all ozone systems are created equal. The Lippert System creates maximum ozone benefit by utilizing a Corona Discharge generator for higher output, a unique mixing chamber for more contact time, and a Balance Barometer for higher ozone concentration. Unlike many ozone systems, all this action takes place in the plumbing so the ozone does its work on the water, rather than the people in it.

Choose Lippert to save time and reduce chemical use!

3 **Chrome Package**

Upgrade the look of your spa with beautiful chrome jets and perimeter trim.

4 **Wetunes™ Music System**

Two waterproof retractable speakers surround you in your favorite music. Don't be limited by a built-in CD player. Wetunes connects to any source like an MP3 or portable CD Player. There is even a convenient storage recess on all Coyote models, perfectly sized for your Ipod.

5 **Acrylic Colors**

Choose from 4 shades of premium cast acrylic, textured to give the sturdy appearance of stone and the feeling of stability under your feet.

Imagine-It Cabinet™ (optional) *

Imagine having the freedom to design your spa cabinet to your personal taste and style. Imagine being able to perfectly match your home or décor. Imagine a victory party in a hot tub emblazoned with your team's logo and colors. Imagine using your hot tub to advertise your business, make a statement, promote your favorite cause, support your team, reveal your personality, or just express your sense of fun.

Made from Lexan, the key component of airplane windows, bulletproof glass and outdoor signs, your cabinet is created using digital printing technology. Customization of your cabinet is fantastically simple, yet truly revolutionary in the spa world. Choose from one of our prepared designs, or create one of your very own.
